

Environmental Auditing: Air Quality Management in Yolo Solano

RELEASE 151 – JANUARY 2021

new & noteworthy

- **Addition of Non-ferrous Metal Melting Furnace Rule:** Coverage of requirements for specific sources of toxic air contaminants was expanded to add Rule 9.6, Non-Ferrous Metal Melting. This rule applies to any person who owns or operates a non-ferrous metal melting furnace and is aimed at controlling emissions of arsenic, cadmium, and nickel from these sources.

This rule has been added to **Air Quality Management in Yolo Solano Air Quality Management District, Rulebook C, Emissions Standards and Other Requirements.**

highlights of this release

- **Air Quality Management in YSAQMD, Rulebook C, Emissions Standards and Other Requirements** was expanded to add Rule 9.6, Non-Ferrous Metal Melting.
